[ACE NY Recommendations to Panels: Power Gen, Transportation, Energy Efficiency and Housing](#)

By Jeff Jones and Anastasia Gordon

In the past two weeks, ACE NY submitted to three Advisory Panels working with the Climate Action Council. Here's more:

ACE NY submitted its third set of [policy recommendations](#) to the advisory panels of the Climate Action Council. The latest set of recommendations is directed at the [Power Generation Advisory Panel](#) and discusses key strategies for maximizing the procurement of renewables, making strategic transmission investments, accelerating policies to invest in energy storage, and promoting multi-port infrastructure investment to support the offshore wind industry in New York. Our recommendations also address how New York State can continue its strong commitment to cost-effectiveness and equity with respect to disadvantaged communities and consumers as well as how we can best prepare for 100% emissions-free electricity by 2040. ACE NY previously submitted [policy recommendations](#) to the Energy Efficiency and Housing Advisory Panel and the [Transportation Advisory Panel](#).
